

DAILY SCHEDULE
September 6, 2016 – May 14, 2017

Hot Water Extraction Demonstration

OSDC interpreters show how bitumen is separated from the oil sands in this 10 minute live presentation.

***Oil Sands* film**

A 10 minute film that introduces you to the geology, history, mining, and extraction processes of the Alberta's Oil Sands.

***Pay Dirt – Alberta's Oil Sands Centuries in the Making* film**

A 45 minute film that describes the history and development of the oil sands in Alberta.

Industrial Equipment Garden & Bucketwheel Exhibit (*closed during winter*)

This outdoor display area features mining equipment that was once used in the oil sands mining industry. "Cyrus," the 850 tonne bucketwheel excavator, is one of the largest land based artifacts in Canada.
